

Product Vision

Version: 1.0

Vision Statement

Trading Platform Pro shall become a professional, modular and enterprise-grade trading platform that combines excellent software engineering with practical trading capabilities.

The platform is designed for long-term evolution and continuous improvement.

Mission

Our mission is to build a trading platform that enables traders and developers to work efficiently, reliably and confidently through a modern, maintainable software architecture.

Core Values

The project is guided by the following values:

- Simplicity
- Reliability
- Transparency
- Maintainability
- Extensibility
- Performance
- Automation
- Quality

Strategic Objectives

The platform shall provide:

- a unified trading cockpit
- configurable workflows
- reusable infrastructure
- scalable architecture
- deterministic execution
- comprehensive observability
- excellent developer experience

Product Principles

Every feature should satisfy the following principles:

- Solve a real user problem.
- Integrate naturally into the existing architecture.
- Avoid unnecessary complexity.
- Be testable.
- Be maintainable.
- Be well documented.

Functional Vision

Trading Platform Pro will gradually evolve into a complete trading ecosystem including:

- Market Data
- Watchlists
- Scanner

- Trading Cockpit
- Portfolio Management
- Risk Management
- Order Management
- Strategy Engine
- Backtesting
- Reporting
- Decision Center
- Plugin System

Non-Functional Vision

The platform shall provide:

- high availability
- predictable behaviour
- low operational complexity
- modular deployment
- strong code quality
- extensive automated testing
- comprehensive documentation

Success Criteria

The project is considered successful when it achieves:

- professional software quality
- scalable architecture
- high developer productivity
- stable releases
- comprehensive documentation
- long-term maintainability

Future Direction

Future development focuses on:

- additional trading workflows
- AI-assisted decision support
- advanced analytics
- improved automation
- plugin ecosystem
- cloud readiness
- multi-broker support

Target Users

Trading Platform Pro is designed for:

- Professional traders
- Active private traders
- Quantitative traders
- Developers
- Future AI-assisted trading workflows

Product Scope

The initial product focuses on the Trading Cockpit.

Future platform applications may include:

- Portfolio Manager
- Market Scanner
- Strategy Lab
- Reporting Services

All applications share the same platform architecture.

Product Evolution Principles

Every product enhancement shall:

- provide measurable user value
- preserve architectural consistency
- integrate into the existing user experience
- remain maintainable
- be fully documented

Product Review Checklist

Before releasing new functionality verify:

- user value is clear
- scope is well defined
- documentation updated
- architecture preserved
- quality standards satisfied
