

UI Guidelines

Version: 1.0

Purpose

This document defines the user interface guidelines for Trading Platform Pro and the Trading Cockpit.

The objective is to provide a consistent, intuitive and professional user experience.

Design Principles

- Consistency
- Simplicity
- Clarity
- Efficiency
- Accessibility
- Responsiveness

Layout

The Trading Cockpit uses a dockable workspace layout.

Main areas:

- Navigation
- Workspace
- Side Panels
- Status Bar
- Notifications

Widget Design

Every widget shall:

- have a clear title
- support resizing
- support docking
- support state persistence
- remain independently usable

Navigation

Navigation should:

- minimize clicks
- provide keyboard shortcuts
- support Command Palette
- preserve user context

Visual Design

- Consistent spacing
- Consistent typography
- Semantic colors
- Light and Dark Theme support
- High information density without clutter

User Interaction

Support:

- Drag & Drop
- Context Menus
- Keyboard Navigation
- Multi-selection
- Undo where appropriate

Performance

The UI should:

- remain responsive
- avoid blocking operations
- load widgets independently
- provide progress feedback

Accessibility

Support:

- keyboard-only operation
- scalable fonts
- high contrast themes
- screen reader compatibility where practical
